PROFILE

AI-native full-stack developer who takes products from concept to production — generating visual designs with AI tools like ChatGPT Images and Google Stitch, translating them into working Figma layouts, and building the frontend and backend that power them. Currently pursuing BCA at Shoolini University and growing into cloud engineering with hands-on learning in Go, distributed systems, and cloud architecture. Seeking an entry-level or trainee role to ship real products and keep deepening these skills.

Core capabilities:

- **AI-native development** — using ChatGPT, Claude Code, Cursor and AI agents to accelerate the entire dev cycle.
- **UI/UX design** — generating visual concepts and interfaces with ChatGPT Images, Google Stitch, v0 and other AI design tools, and translating them into working Figma designs.
- **Full-stack development** — building frontend interfaces and writing backend APIs, business logic and database integrations.
- **Cloud engineering** — currently learning Go, distributed systems and cloud architecture.
- **AI automation** — MCP servers, custom skills, n8n and agentic workflows.

PROFESSIONAL EXPERIENCE

IQSetters — Full-Stack Developer Intern

Dec 2025 – Jun 2026 | Delhi, India (Hybrid)

- Shipped a 150+ page HRM platform in NestJS, React, and PostgreSQL with 100+ concurrent production users, using AI-assisted code generation throughout the build cycle.
- Built custom MCP servers and Claude skills to extend AI tooling for the team's workflows, cutting repetitive dev work significantly.
- Ran a mixed model strategy across open-source (Llama, Mistral) and frontier models (Claude, GPT-4o) to match task complexity, reducing AI API costs by ~90% with no drop in output quality.

PROJECTS

Bulk Image Watermarking Engine — React, TypeScript, Canvas API

Jul 2024 | github.com/surjeet-web/bulk-image-watermarking-tool | bulkwatermarksystam.netlify.app

- Batch watermarks 500+ images a minute using async Canvas API rendering, with memory management so the browser doesn't crash on large exports.

Code Snippet Manager — Next.js, TypeScript, localStorage

Jul 2024 | github.com/surjeet-web/Code-Snippet-Manager | code-snippet-manager-theta.vercel.app

- Client-side only. Stores and searches 1,000+ code snippets in the browser with tag filtering by language and category — no backend, no data leaving the device.

Real-Time Collaborative Workspace — Next.js, Node.js, WebSockets, Redis

Aug 2024 | github.com/surjeet-web

- Multi-user editing with live chat. Sub-50ms sync latency in local testing, powered by Redis Pub/Sub and Socket.io.

SKILLS

Languages: TypeScript, JavaScript, Go, HTML5, CSS3, SQL (PostgreSQL, Supabase)

Frontend & Design: React.js, Next.js, Tailwind CSS, Figma, UI/UX with AI tools (ChatGPT Images, Google Stitch, v0, Framer AI)

Backend: Node.js, NestJS, REST APIs, WebSockets, Redis, business logic & database integration

DevOps & Tools: Git, GitHub Actions, Docker, Vercel, Vite

AI & Automation: ChatGPT, Claude Code, Cursor, n8n, MCP Server Development, Custom Skills, Agentic Workflows, Multi-model Orchestration (Llama, Mistral, GPT-4o)

EDUCATION

Bachelor of Computer Applications (BCA), Shoolini University

Coursework: Data Structures & Algorithms, Distributed Systems, Database Management, Software Engineering, Operating Systems.

12th Grade, Commerce with Mathematics — 78%

ACHIEVEMENTS

- **AI Workflows:** Build full agent pipelines using n8n and Claude Code that automate dev tasks end to end — from spec parsing to working code.
- **Freelance:** Built a Next.js website with full SEO from scratch, maintained it for 3 months, and grew it to 5,000+ daily visitors.
- **YouTube:** Grew a gaming channel to 16,000+ subscribers and 5M+ views independently.
