Surjeet

Full-Stack Developer | React, TypeScript & AI-Assisted Workflows

New Delhi, India | codieshiv.web@gmail.com | +91 9266023517

GitHub: surjeet-web | LinkedIn: codieshiv0 | Portfolio

PROFILE

BCA student with hands-on full-stack development experience, a developer internship, and a background in customer support. Builds web applications with React, TypeScript, Node.js and NestJS, and uses MCP integrations and AI-assisted workflows to streamline development. Seeking a junior developer or software engineering trainee role.

TECHNICAL SKILLS

Web development: TypeScript, JavaScript, HTML, CSS, React, Next.js, Tailwind CSS, Node.js, NestJS

Data & tooling: PostgreSQL, SQLite, Prisma, Supabase, Git, Docker, GitHub Actions, Vercel

AI & automation: Claude Code, MCP server development, custom skills, n8n, multi-model workflows

DEVELOPMENT EXPERIENCE

Full-Stack Developer Intern | IQSetters

Dec 2025 - Jun 2026 | Delhi, India | Hybrid

- Contributed to an HRM platform using NestJS, React and PostgreSQL, with AI-assisted development across the build cycle.
- Built custom MCP servers and Claude skills to support team-specific workflows and reduce repetitive development tasks.
- Matched open-source and frontier models to task complexity to manage AI API costs and support faster iteration.

Customer Service & WordPress Developer | Shyam Technical

Aug 2024 - Jun 2025 | Delhi, India

- Built a WooCommerce storefront for electronics components, including product listings, pricing and checkout.
- Handled technical customer queries in Zendesk and Freshdesk; coordinated order follow-ups by phone, email and WhatsApp.

SELECTED PROJECTS

Workforce & Payroll Management Prototype | React, TypeScript, NestJS, Prisma

- Contributed to a modular HR application with payroll-run approval stages, payslip publication and employee-loan workflows.
- Backend implementation includes loan validation and EMI calculations, persisted workflow records, and registered JWT and role guards.

Offline-First Personal Finance App | React Native, TypeScript, SQLite

- Local-first finance application with searchable transactions, exact-cent expense splitting and CSV statement reconciliation.
- Uses relational SQLite storage and FTS5 search, with unit tests for split rounding and reconciliation edge cases.

DiskDoom | Swift, TypeScript, Cloudflare Workers

- macOS disk-analysis project with cancellable scans, exclusion rules and staged duplicate detection using sampled and full-file hashing.
- Includes a Cloudflare licensing service for activation limits and signed-token validation, plus Swift and worker test suites.

ADDITIONAL EXPERIENCE

Sales & Recovery Agent | Offshoot Financial Services | Jun 2026 - Aug 2026

- Made outbound financial-product and overdue-account calls, maintained CRM records and escalated follow-ups when needed.

EDUCATION & ADDITIONAL ACHIEVEMENTS

Bachelor of Computer Applications (BCA), Shoolini University - currently pursuing.

Class XII: Commerce with Mathematics - 78%.

Built and maintained a freelance Next.js website with SEO; independently grew a gaming YouTube channel to 16,000+ subscribers and 5M+ views.
